- Tools & Deployment- Git,GitHub,Figma,Postman,Vercel,Render,Netlify

## LANGUAGES

---

- English
- Amharic
- Chinese

## Projects

---

- Furniture website,** *Developed a full-stack furniture website enabling owners to create, update, delete, and showcase their furnitures efficiently.*  
Implemented user authentication, Create collection of furniture to showcase. Tech Stack: Nextjs, Node.js, Express, MongoDB, JWT.
- University Counseling website,** *As Final year project We developed a web platform for student counseling with appointment booking, mood tracking, real-time chat, and role-based dashboards. Built using React, Node.js/Express, MongoDB, Socket.IO, and Tailwind CSS*
- Food Review website,** *- Built a platform where users can browse restaurants, post reviews, and rate dishes.*
- Designed interactive UI for adding reviews and integrated role-based access for users and admins.
  - Tech Stack: PHP, Tailwind CSS, MYSQL.

**Movie Explorer**, *React.js Movie Search & Information App*

- Built a Movie Explorer web app using React.js that fetches and displays movie titles, posters, and details from an external API. Designed a responsive UI with reusable components and efficient state management using React Hooks.

**Visit Management System**, *I develop internal appoint management for a company*

Developed and deployed an internal Visit Management System (VMS) for a Company using a full-stack Next.js, React, and PostgreSQL tech stack, enhancing workplace security and operational efficiency. The system digitizes the visitor registration process, manages user roles (administrators, receptionists, guards), and provides real-time visitor tracking and reporting capabilities

**Sem ena Worq**, *A company portfolio website*

Developed a full-stack company portfolio website using the MERN stack (MongoDB, Express.js, React.js, Node.js). Implemented secure authentication using JWT, file uploads with Multer, and email functionality with Nodemailer. Designed RESTful APIs for data management and built a responsive frontend with reusable React components. Ensured secure data handling and efficient backend integration.
